Projects – View more on GitHub

VolunTracker Web App | voluntracker.net | React, Azure, .NET, GitHub Actions, MySQL

- Dynamic web application that allows users to create accounts, login, and build or join organizations/events in need of volunteers
- Worked with my senior capstone team of 4 with React for the frontend and .NET for the backend
- My primary focus was designing and implementing frontend components such as creating organizations, creating volunteer events, and faq/about us pages
- Implemented MySQL database using Azure
- Project was managed through GitHub and deployed using Azure

BlackJack Browser Game | JavaScript, HTML/CSS, WebStorm

- Created game of BlackJack that is playable on a local host browser
- Designed using HTML and CSS
- Game rules and functionality is coded using JavaScript
- Has functional betting, player stats, dealer hand, user hand, and game state functionality

Work Experience

Pacific Sunwear Co.

Store Manager

November 2020 – Present

- Manages all opening and closing procedures including sales floor and backroom
- Leads assistant management team of 4 and sales associate team of 13
- Communicates store operations and feedback to District Manager to grow the business and meet expectations
- Understands key business reports and payroll tools to evaluate and communicate action steps for performance
- Started as sales associate and worked my way up to highest store level position
